

Laser printer Temporary Tattoo Paper

Do not use the tattoo tack or a tattoo made in this way if you are pregnant or nursing a baby.

The special water slide temporary tattoo paper sheets are specially made for use in laser printer or copier machine.

It is recommended that you try your designs on plain paper first before using the water slide removable tattoo paper. Doing this is an insurance that your design is to your satisfaction before you try on the water slide temporary tattoo paper.

This water slide temporary tattoo paper should be fed into your printer one sheet at a time. It should be fed alone. No other paper should be present on your printer.

STEP 1: Edit the size and shape of your image. **YOU MUST REVERSE ALL IMAGES AND TEXTS.**

If there is no text in the tattoo, there is no need to print mirror image. The tattoo will be a mirror image of the original image. You can easily fit 15 to 30 tattoos per page more or less depending on the size of each tattoo

STEP 2: Print on the matte paper that is stamped on one side. *Set the printer setting as "120g or more thick paper" using an office copier, laser printer or dye sublimation printer. (For Alps MD4000: select specially coated paper and multi pass black. Other media selections may work as well)*

STEP 3: You have to attach the glossy transfer adhesive sheet to the printed sheet. Peel back a small section of the adhesive sheet and place it on the print.

STEP 4: Now, slowly take off the sheet and place the adhesive sheet onto the print until both sheets are combined. Press out any air bubbles if they appear.

STEP 5: Now use a pair of scissors or a craft knife to cut out your image. Cut as closely as you can to the image.

STEP 6 : Peel off the glossy adhesive film from the image (this is the adhesive sheet from step 4.)

STEP 7: Place the tattoo onto your skin. Rub well.

STEP 8: Next, wet some tissues or a towel and Soak the paper with warm water on the tattoo. Wait about 20-30 seconds and then slide the paper away. If paper does not move freely then wait a little bit longer. Slip off the paper and a beautiful tattoo will reveal on your skin.

Disclaimer: We have tested our media in various personal laser printers with good results. The user of this paper/film must determine the suitability of this product before beginning production, using his equipment and method of application. The sellers and manufacturers maximum obligation shall be to replace paper/film that has been found defective. Neither the manufacturer nor the seller shall be held liable for any injury, direct or consequential, arising out of the use of, or inability to use this paper/film.
